**Chapter 2- Take Home Test**

**Section A: True or False**

Read each statement and decide if it is true or false. If the question is false, please make the appropriate corrections to make the statement true.

- |   |   |   |
|---|---|---|
| 1. Charles Darwin introduced the theory of natural selection  | T | F |
| 2. Physical Anthropology strives to understand human cultures   | T | F |
| 3. Learned behavior is a result of nature   | T | F |
| 4. Archaeologists use artifacts to understand past cultures   | T | F |
| 5. A person who is racist is a cultural relativist  | T | F |
| 6. Ethnocentrism is the detailed description of a particular culture                                    | T | F |
| 7. Horticultural cultures use manure and chemical fertilizers to return essential nutrients to the soil | T | F |
| 8. Humans and primates are similar because we both have opposable thumbs                                | T | F |

**Section B: Chart Completion**

Use the cultural adaptations and complete the chart by giving a description of each

Adaptation	Description
Foraging	
Horticultural	

<b>Agricultural</b>	
<b>Pastoral</b>	
<b>Industrial</b>	
<b>Communication- Based</b>	

### **Short Answer:**

Answer the following questions on a separate sheet of paper

1. Can you isolate physical anthropology from cultural anthropology? In a paragraph, discuss why or why not
2. Create a chart to describe the research methods used to study each branch of cultural anthropology.
3. How might anthropology contribute to other scientific disciplines? Provide specific examples to explain your answer
4. In your own words, explain how studying other cultures can help us gain a better understanding of our own culture?
5. What are positive and negative changes to our culture resulting from the emergence of a communication-based society?
6. What are three characteristics that humans and primates do **not** share?
7. Explain the difference between Darwin's theories of natural selection and evolution
8. "Human beings are more alike than different." Do you agree or disagree with that statement? Explain your answer with support from the chapter
9. Can the results from Jane Goodall's work with chimpanzees be applied to the study of human behavior?
10. How might you use cultural relativism to overcome the ethnocentric attitude of a friend or classmate?
